

HASSAN AL NUAIMI

Senior Engineer – Business & Government Solutions (IT Operations / Core Networks & Systems Support)

Base: Abu Dhabi, Abu Dhabi, United Arab Emirates | **Phone:** +971 55 219 7740 | **Email:** hassan.alnuaimi@protonmail.com | **LinkedIn:** linkedin.com/in/hassan-alnuaimi

Professional Summary

Systems and infrastructure engineer with 7+ years of experience maintaining and enhancing hybrid server-client networks in medium/large environments. Strong hands-on background supporting mission-critical operations environments (24/7), including UNIX/Linux administration (Solaris, HP-UX, Digital Unix, Red Hat, Ubuntu) and Windows enterprise services (AD, DNS, DHCP, LDAP). KPI-driven, calm under pressure, and highly reliable in incident response and change windows.

Core Competencies

• Hybrid server-client networks (multi-site) • UNIX/Linux administration (Solaris/HP-UX/Digital Unix/RHEL/Ubuntu) • Windows Server/Active Directory • DNS/DHCP/LDAP • Hardware & software installation, maintenance, troubleshooting • Monitoring & performance KPIs • Change management & patching • VoIP service support • Documentation & ITIL-aligned operations

Professional Experience

Senior Systems Engineer (Core Network & Systems Support)

FalconSat Operations Services – Abu Dhabi, UAE | Jan 2021 – Present

- Supported mission-critical operations systems used in a satellite control center environment, including multi-user UNIX/Linux servers and secure access nodes.
- Owned server lifecycle tasks: provisioning, OS hardening, patching, backups, and recovery drills across RHEL/Ubuntu and legacy UNIX hosts.
- Maintained Windows services supporting operations and business systems: Active Directory, DNS, DHCP; improved resolution reliability through DNS zone standardization and health checks.
- Led integration and troubleshooting across bespoke applications and hosting platforms; reduced recurring incidents by 28% via root-cause remediation and monitoring alerts.
- Established system KPIs (availability, MTTR, patch compliance) with weekly reporting to management and cross-functional stakeholders.
- Supported VoIP and value-added services during maintenance windows, ensuring minimal downtime and clear handover notes.

Systems Engineer

Gulf Enterprise Networks – Abu Dhabi, UAE | Jul 2017 – Dec 2020

- Administered mixed environments spanning Solaris and Ubuntu servers plus Windows Server, including directory services and licensing compliance checks.
- Performed hardware/software installation, troubleshooting, and upgrades across multi-user systems; coordinated vendors for replacement parts and warranty support.
- Implemented centralized logging and health monitoring, improving early detection and reducing after-hours escalations.

Selected Projects

- **Operational Monitoring Upgrade** (2023): Deployed unified monitoring dashboards for server KPIs (CPU/memory/disk, service checks, availability). Reduced MTTR by ~22%.
- **Legacy UNIX Stabilization** (2022): Standardized configuration baselines and patch cadence for Solaris/HP-UX hosts; improved patch compliance and reduced outages.
- **Directory Services Cleanup** (2021): Reorganized AD groups and DNS records; reduced authentication-related tickets by 35%.

Education

Bachelor of Science (BSc) in Computer Science

Khalifa University – Abu Dhabi, UAE | 2013 – 2017

Certifications

- Red Hat Certified System Administrator (RHCSA)
- ITIL Foundation (Service Management)
- Microsoft Certified: Windows Server Fundamentals (legacy)

Technical Skills

Operating Systems: Solaris, HP-UX, Digital Unix, Red Hat Enterprise Linux, Ubuntu, Windows Server

Enterprise Services: Active Directory, DNS, DHCP, LDAP

Operations: Patch management, backup/restore, monitoring, incident response, change management, documentation

Networking (working knowledge): TCP/IP, routing fundamentals, firewalls (ops support), VPN access controls

Languages

English (Fluent) • Arabic (Native) • Hindi (Intermediate)

Achievements

- Recognized for **Operational Excellence Award** (2024) for improving availability KPIs and incident response procedures.
- Authored a repeatable **runbook & handover standard** adopted by the on-call rotation team (2022).

Interests

Space systems • Reliability engineering • Automation tooling • STEM mentoring
